Welcome to Janytree

피부가 건강하고 아름다우면
삶도 건강하고 아름답습니다.

피부 전문가들이 모여 14년 간의 연구를 기반으로,
피부 속 세포만을 생각하며 지금까지 연구에
매진하고 있습니다.

그동안 화장품은 내적인 피부 건강보다 외적인 아름다움에
치중해 왔습니다. 그러나 21세기에 들어서면서 화장품은
그 가치에 큰 변화가 생겼습니다.

그 가치 변화의 중심에는 더모셀화장품(Dermo Cell
Cosmetics)이 있습니다. 더모셀화장품이란, 단순히 외적
인 안티에이징에서 벗어나 피부 속 세포의 균형과 활성화
를 통해 피부 속부터 건강해지는 것을 목적으로 하는 가장
진화된 기능성 화장품입니다.

이제 서정적 감성에 의해 선택 받던 화장품의 시대는 지
났습니다.

피부 세포들은 각각 정해진 고유 기능을 수행하고 있습
니다. 어떤 이유에 의해서든 하나의 세포가 그 기능을 수행
하지 못하게 되면 피부가 변형되거나 늙게 되고 다양한 트
러블이 나타나게 됩니다.

저희 제니트리에는 피부 속 세포를 건강하게 변화시키며 더
욱 안전하고 피부가 좋아하는 바른 화장품만을 개발하
여 왔으며 앞으로도 변함없는 마음과 자세로 이어나갈 것
입니다.

피부가 건강해지고 변화되는 행복한 경험을 여러분과 함께
나누고 싶습니다.

감사합니다.

대표 김 은주

**If your skin is healthy and beautiful,
your life is also healthy and beautiful.**

Skin professionals get together and strive
to concentrate on the skin research on the
basis of 14-year studies while only thinking
of cells in the skin.

Meanwhile, cosmetics have been focused
on external beauty rather than internal
skin health. However, as it enters the 21st
century, the value of cosmetics is greatly
changed. Dermo-cosmetic is located at the
very heart of the changes in their value.
The Dermo-cell-cosmetic is the most
advanced functional cosmetic which aims
to be healthy in the skin through balance
and activation of cells rather than simply
external anti-aging effects.

Now, the era of cosmetic which has been
selected by lyrical sensibility has passed.
Each skin cell plays its own roles which are
assigned to each cell. If a cell does not
perform its function for any reason, the skin
is deformed or aged, which causes a variety
of troubles.

Our Janytree has developed only safe
and right cosmetics which make skin cells
healthy and are favorable to the skin. We
continue to keep our mind and attitude in
the future.

We would like to share happy experience
in which the skin becomes healthy and
beautiful with you.

Jany Kim *anyju*

**N°1

N°1 Dermo-Cell-Cosmetic

Our philosophy

스스로 피부 능력을 깨우는
N°1 더모-셀-화장품

“피부 전문가는 2가지에 집중합니다.”
첫번째, 어떻게 흡수시킬 것인가?
두번째, 어떻게 피부 속 세포를 활성화시킬 것인가?

아무리 좋은 성분도 흡수가 되어야 제 역할을 할 수 있습니다.

인투메디의 핵심 포몰레이션 노하우는 기능성 성분과 유효성분이 부작용없이 피부 내로 흡수되어 피부 세포를 활성화시키며 피부 세포 본래의 기능을 회복시키는데 있습니다.

눈에 보이는 즉각적인 효과 위주의 제품,
아무리 좋은 컨셉을 가진 원료라 할지라도 장기적으로는 피부에 역효과를 주는 제품,
인투메디는 이런 제품을 만들지 않습니다.

화장품은 화장품 다워야 합니다.
화장품은 피부 본연의 기능을 회복시키고 활성화시키는 평범하지만 놀라운 일을 직접 할 수 있어야 합니다.
지속적인 사용에도 피부가 안전하고 피부 속 세포를 활성화시켜 내적인 아름다움을 추구하는 화장품, 피부 전문가들의 끊임없는 연구활동으로 피부과학 기본 원칙을 지켜 나갑니다.

Our competencies

피부전문가를 위한 특별한 기능성화장품
피부 속 만을 바라보고 피부세포를 건강하게 변화시킬 수 있는 피부전문가들을 위한 특별한 기능성 화장품

라이프-체인징 랩

Wake up the power hidden in your skin
N°1 Dermo-Cell-Cosmetic

“Professionals are focusing on 2 things.”
First, what makes it absorbed in the skin?
Second, how does it activate skin cells?

No matter how good it is, it can play a role once it is absorbed.

Key formulation know-how of Intomedi is to activate skin cells and to restore the skin's original features by allowing functional and active ingredients to be absorbed without any side effects.

Intomedi® does not produce the following products. Products mainly with visible and immediate effects. Products made of raw materials which have a good concept but give adverse effects to the skin for a long time.

Cosmetics need to be cosmetics.
Cosmetics should be able to directly perform normal but amazing tasks to restore and activate skin's natural functions.
We would like to produce the cosmetics pursuing internal beauty by keeping the skin safe and activating cells in the skin despite continuous use. We keep the basic principle of skin science through continuous research of our skin professionals.

Our competencies

Speciality for professionals
Special functional cosmetics for skin professionals which are only looking at the inside of the skin and making skin cells healthy

Life-changing lab
Research institute leading the changes of life through changes starting from the inside of the skin

Core Competitiveness

Skin Science R&D Center

We are a derma cosmetic company with scientific roots. Accordingly, technology is crucial to researching, developing, manufacturing and marketing. We are constantly seeking to improve our technologies and to provide safe, high-quality products and service.

Skin Science R&D Center
Certified by Korea Industrial
Technology Association

Safety Assurance System

Quality and safety remains our top priority. ISO 22716 is the standard describing the Cosmetics Good Manufacturing Practice and a set of hands-on advice, operational rules, technical and administrative factors to ensure consumers' safety.

ISO22716 - CGMP
certified by Bureau Veritas
in France

Smart Factory

Janytree's genuine competitiveness is the digitalization through building the smart factory. We set the basic SCM system, digitally and smartly manage the raw materials and packages, manufacture products, and distribute them.

Smart managing raw materials
under SCM system

Janytree's Clean Zone for safe and reliable manufacturing:

- Raw material storage
- Raw package storage
- Packaging facilities
- Cleaning Room
- Weighing Room
- Filling Room
- Quality Control Zone
- QA Sampling Storage
- Finished Product Storage

- Microbiology Laboratory
- Cell Culture Room

Key Technologies

1. 발효에 의한 바이오 전환 기술

활성성분을 유용미생물을 이용하여 바이오 전환시키는 기술은 의약품분야와 화장품분야에서 크게 각광받고 있는 잠재력이 매우 높은 기술입니다. 발효에 의한 바이오 전환기술의 최대 장점은 유용미생물이 성장하면서 생성하는 전환효소에 의해 유효성분이 활성화되고 분해효소의 작용에 의해 저분자화되어 피부흡수성이 높아진다는 점입니다. 또한 발효과정을 거친 성분은 피부자극성과 피부알러지 성분이 감소하여 피부안전성이 더욱 상승합니다. 제니트리외 발효공정은 제니트리만의 차별화된 자체 발효공법 기술로서, 48시간이내 혐기성액상발효로 유용성미생물이 최대의 성장점에 있을 때 발효를 정지시켜, 전환효소와 분해효소의 작용은 극대화시키고 미생물의 사멸로 인한 독성 물질의 분비는 차단시키는 독보적인 기술력을 자랑합니다. 제니트리의 독자적인 발효공법에 의해 개발된 활성성분은 제니트리 전제품에 적용되어 차별화된 효능을 갖는 제품개발을 가능하게 하였습니다.

1. Bio-conversion technology

The technology which converts active materials to bio active materials by using effective microorganisms receives much attention in areas of pharmaceuticals and cosmetics. Thus, it has high potentials. The biggest advantage of the bio-conversion technology by fermentation is to activate active ingredients by conversion enzymes produced while effective microorganisms grow and to enhance skin absorption through low molecules of ingredients made by decomposition enzymes. In addition, ingredients subjected to the fermentation process enhance skin safety, because the skin irritation and skin allergy are reduced. The fermentation process of Janytree is our own differentiated fermentation technology. It is the anaerobic liquid fermentation within 48 hours. When effective microorganisms reach the maximum growth point, the fermentation is stopped. Thus, the technology maximizes actions of conversion and decomposition enzymes, and prevents the secretion of toxins caused by the death of microorganisms. It boasts of a unique technology of Janytree. Active ingredients produced by Janytree's unique fermentation process are applied to all products of Janytree. Thus, it allows us to develop products with differentiated efficacy.

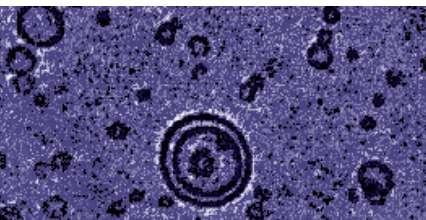

2. 나노 리포좀 기술

아무리 효과가 뛰어난 성분이라도 피부내로의 침투가 용이하지 않다면 효과를 나타낼 수 없기 때문에, 활성성분은 반드시 각질의 세포간극을 통과하여 피부 깊숙이 침투할 수 있어야 합니다. 리포좀은 피부흡수를 위한 대표적인 기술로서, 피부의 세포막과 가장 유사한 지질 이중막의 형태를 띠고 있어 친수성 성분 뿐 아니라, 유용성 성분도 피부에 흡수시킬 수 있습니다. 또한, 피부세포간극을 쉽게 통과시키기 위해 유효성분의 크기를 나노크기화하고자 하는 많은 노력이 있습니다. 제니트리가 채택한 리포좀 기술은 평균 250nm 정도의 나노사이드로서 원료단계 뿐 아니라, 화장품 제조 단계에서도 리포좀 기술을 적용하고 있어 피부간극에 대한 친화성이 좋고 피부침투력이 매우 뛰어납니다.

2. Nano liposome technology

If the ingredient has excellent effects but it does not easily penetrate into the skin, it is useless. Thus, the active ingredients must pass through the intercellular space of keratin cells and can penetrate deep into the skin. Liposome is a representative technique for skin absorption. Since it has a form of lipid bilayer which is the most similar to cell membrane of the skin, it can allow hydrophilic ingredients as well as active ingredients to be absorbed in the skin. In addition, many researchers make every effort to make active ingredients in nano sizes in order to easily pass through the intercellular space of the skin. The liposome technology chosen by Janytree is to make active ingredients in about 250 nm. Since the liposome technology is applied to the stage of raw materials as well as the stage of manufacturing cosmetics, it has a good affinity for the intercellular space of the skin and excellent skin penetration abilities.

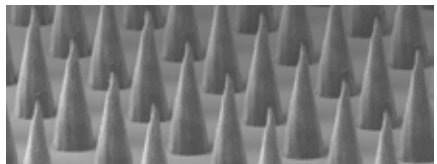

2. 마이크로니들과 TDDS 기술

마이크로니들은 머리카락보다 가늘고 정교한 미세 바늘이 부착된 원통형의 장치로서 마사지를 통해 피부 또는 두피에 작은 통로를 만들어 줍니다. 이 통로를 통해 분자량이 큰 약물이나 이온화 혹은 극성화가 어려운 약물을 피부 또는 두피내로 효과적으로 침투시킬 수 있으며 약물의 농도도 크게 높일 수 있습니다. 또한 마이크로니들은 두피에 미세한 통로를 내고 자연스러운 상처치유 과정을 거치기 때문에 그 자체만으로도 모근을 활성화 시키고 세포 스스로의 재생을 유도합니다. 제니트리는 2009년에 의료기기 2등급에 해당하는 마이크로니들(약물흡수피부자극기)의 생산 기반을 직접 확립하고 한국 식약처로부터 품목제조허가 및 제조업허가, KGMP를 득하였습니다. 공인된 품질관리 하에 생산된 마이크로니들은 대학병원을 비롯한 병원에서 전문가들에 의해 피부 및 두피개선을 위해 사용되어 졌으며, 제니트리는 마이크로니들에 대한 기술적인 우위성을 바탕으로 마이크로니들과 함께 사용하는 전문화 된 기능성 앰플을 개발하여 왔습니다.

3. Micro-needles and TDDS technology

Micro-needles are the cylindrical devices attached with a thin and fine needle which is thinner than hairs. It can make a small path on the skin or scalp through massage. Through the path, drugs with high molecular weight or drugs which are difficult to be ionized or polarized can be effectively penetrated into the skin or scalp. The concentration of drugs can be greatly increased. In addition, since the micro needle makes a fine path on the scalp and the path can pass through a natural healing process, it can activate hair follicles and induce the regeneration of cells. Janytree directly established the production basis for a micro needle (drug absorption skin stimulator) belonging to class 2 medical devices in 2009, and obtained the product manufacturing license, manufacturing business license and KGMP from Ministry of food and drug safety in Korea. Micro needles produced under certified quality management are being used to improve the skin and scalp by professionals in University Hospitals and Clinics. Janytree has developed professional functional ampoules which can be used together with micro needles on the basis of our technical superiority.

Potency skin energy It's Bio-peptone®

Novel factors

스무살 피부를 찾아주는
세가지의 강력한 피부에너지

1. Bio-peptone®

피부 세포를 배양하는 배지성분에서 영감을 얻어 개발한 바이오펙톤은 유산균발효기술을 통해 더 저분자화 되어 피부 세포를 효과적으로 활성화시키고 피부를 더욱 건강하게 만듭니다. 또한 빛과 열에 안전한 바이오펙톤은 리포솜 기술이 더해져 피부에 빠르게 흡수되고 피부 세포재생주기동 안 안전하게 효과를 발휘합니다.

2. Bio-cepabex™

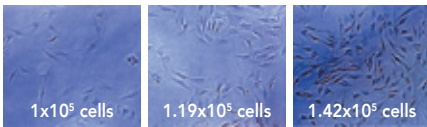

피부에 가해지는 모든 자극은 피부세포 아래에 있는 혈관을 확장시키고 혈관벽을 느슨하게 만들며, 혈관을 피부 가까이 끌어올려 피부 세포에 다양한 위험 인자를 발생시킵니다. 바이오세파벡스™는 보다 작은 분자량으로 피부에 빠르게 흡수되어 자극으로 인한 혈관의 과생성을 억제시키고, 확장된 혈관을 빠르게 정상화시켜, 피부를 안전하게 보호합니다.

3. Bio-papilacell™

모유두는 모낭의 기저부에 존재하면서 모낭과 모근을 구성하는 세포들에게 산소와 영양을 공급하는 세포로 모낭 주기와 모발 성장에 핵심적인 역할을 담당합니다. 제니트리 가 개발한 바이오파필라셀은 모낭형성을 유도하는 모유두 세포(derma Papilla cell)와 모발을 만들어내고 모발을 성장시키는 모모세포(germinal matrix cell)를 동시에 활성화시키는 강한 힘으로 탈모방지과 발모촉진에 보다 근원적인 해결책을 제시하고 있습니다.

Excellent Skin Improvement proved by Results of three patented factors

Stimulated growth of dermal cells
▶ Improves wrinkles and skin elasticity

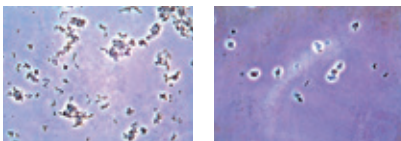

Dermal cell growth on general purpose culture medium

Dermal cell growth on EGF-containing culture medium

Dermal cell growth on patented substance-containing culture medium

Extinction of acne germs
▶ Controls sebum and improves oily skin problems

Acne germs that are normally working on general purpose culture medium

Acne germs that are immediately died with patented substances

Three potency skin energies to find your youth

1. Bio-peptone®

Bio-peptone® developed through our inspiration in ingredients of medium where skin cells are cultured is made in low molecules through the lactic acid fermentation technology. Thus, it effectively activates skin cells and makes the skin healthier. In addition, since the liposome technology is added to bio peptone which is tolerant to light and heat, it is rapidly absorbed in the skin and it is safely effective during the skin cell regeneration cycle.

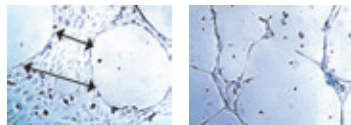

2. Bio-cepabex™

Since all the stimuli applied to the skin expand blood vessels under the skin cells, loosen blood vessel walls and pull up the blood vessels to the skin, a variety of risk factors are generated in the skin cells. Bio-cepabex™ is rapidly absorbed in the skin because it is made in low molecules. It prevents overproduction of blood vessels caused by stimulation, rapidly normalizes expanded blood vessels, and safely protects the skin.

3. Bio-papilacell™

The dermal papilla is present in the base of the hair follicles and provides cells of hair follicles and hair roots with oxygen and nutrition. It plays a key role in hair follicle cycle and hair growth. Bio-papilacell™ presents a more fundamental solution to prevent hair loss and to promote hair growth by simultaneously activating derma papilla cells inducing the formation of hair follicles and germinal matrix cells promoting hair growth.

Inhibited inflation of micro-vessels in the dermal layer
▶ Improves redness and soothes sensitive skin

Inflated capillary blood vessel in the dermis caused by irritation

Inflation-inhibited capillary blood vessel in the dermis with Fermented Extract of Onionskin.

Inflated micro-vessel caused by irritation

Inflation-inhibited micro-vessel with patented substances

Above testing results are proved through repetitive, long-term experiments by researchers of Janytree Skin Science R&D Center and protected under patent law and technology escrow agreement.

EGF HYDRO ANTI-LINER

For evening primrose oil, linoleic acid, linolenic acid, and other essential fatty acids. It is a natural skin conditioner that helps to maintain the skin's natural moisture barrier. It is also a powerful antioxidant and helps to protect the skin from environmental damage. It is suitable for all skin types.

N°1 Dermo-Cell-Cosmetic

Recover the 20s skin hidden in your skin

Professional Line

1. Medical Solution

MS for Dermis

As a dermatological ampoule formulated by mixing less than 500kDa into pharmaceutical grade of **super pure distilled water*** and **Oligo HA*** for moisturizing, it has the excellent effect on skin improvement and safety.

- The best adapted solution to specific skin concerns.
- The exclusive Bio-peptone® technology.
- A highly concentrated formula with patented ingredients and functional ingredients
- Safety strength : 7 toxic Ingredients to avoid.
- The enhancement of skin permeation with multi-layer liposome technology.

MS1

EGF Hydro Anti-Linex

For aging skin, fine lines, wrinkles
A powerful anti-aging solution
Highly enriched with 5 growth factor complex including stemcell growth factor, Adenosine, collagen, hyaluronic acid and growth hormone. It acts deep down and accelerates skin cell turnover to improve the appearance of lines, wrinkles and loss of firmness

MS2

Cysteine Intensive Brightenex

For pigmented skin, black spots
An advanced anti-darkness solution
Highly enriched with cysteine, vitamin C, hyaluronic acid, collagen and super antioxidants including glutathion and SOD. It acts deep down to improve the appearance of discoloration and even visibly skin tone, as well as maintain long lasting skin uniformity and radiance

MS3

Placenta De-Aging Duplex

For pores and stretchmarks
A cell activation and repair solution
Highly enriched with placental growth factor, genistein, hyaluronic acid, collagen, and copper tripeptide including horse* placenta protein. It intensely reconstitutes superior layers of the epidermis to help reduce stretch marks and minimize enlarged pores.

MS4

Onion VK Red Skin Control

For red and sensitive skin
A potent anti-redness solution
Formulated with a patented Bio-cepabex™, glucosamine, amino acid, and asiaticoside including vitamin K. It instantly calms skin redness and heat damage after laser treatment and UV exposure, as well as enhances skin's natural self-defenses.

MS5

Peptides Dry Skin Control

For very dry and sensitive skin
A ultimate anti-dryness solution
Formulated with a combination of hydration, regeneration and antibacterial peptides including AQP-1 (Aquaporin 1) and snail secretion. It intensively soothes dryness and enhances skin's immunity while infusing and retaining water in the skin.

MS6

Vitamins Oily Skin Control

For oily trouble skin
A powerful anti-trouble solution
Highly concentrated with stable and effective 6 vitamin complex, algin, zinc, salicylic acid, teatree and asiaticoside. It fights the production of excess oil and balances the pH of the skin. It also helps reduce dead cell and blemishes, as well as prevent future breakouts.

Professional Line

2. Esthetic Solution

ES for Epidermis

As a highly concentrated esthetic ampoule by blending various kinds of natural moisturizing ingredients into **Chamaecyparis Obtusa (phytoncide) Water*** from a non-polluted clean area and **Cellulose*** for moisturizing and rubbing, it helps to improve the overall health of the skin. It is designed for scientifically advanced skin care.

<p>ES1</p> 	<p>ES2</p> 	<p>ES3</p>

- Anti-DHT : Genistein
- Blood circulation : Triaminodil
- Anti-sebum : Capryloyl Salicylic Acid
- Anti-inflammation : Asiaticoside, Centella Asiatica, Portulaca Oleracea

INTO MR®

The micro-needling therapy is one of the most optimal treatment providing an improvement of the skin texture, particularly to every type of scars.

피부관리는 과학 !

금도금(Gold plating) 으로 금속알러지 걱정을 줄이고 피부에 안전하게 설계된 INTOMR® (인투엠알)이 100년 넘게 증명해온 마이크로 니들링 테라피의 피부 과학을 실현합니다. 피부 본연의 힘을 강화하세요. 피부 스스로 변화를 일으킵니다.

화장품 흡수엔 역시 MTS !

MTS(Micro Needle Therapy System)은 몇 번의 가벼운 롤링으로도 피부에 수많은 흡을 생성하므로 피부 깊이 화장품이 흡수될 수 있도록 도와주는 최적의 미용기구입니다. 능을 강화하여 피부 속부터 건강하게 만들어 줍니다.

화학적 시술 No ! 천연 방법 Yes !

화학적 시술로 인해 자꾸만 민감해지는 제 2의 피부 고민을 MTS로 해소할 수 있습니다. 금도금으로 피부 안전성을 높인 INTOMR® 의 마이크로 니들링 테라피는 피부 본연의 기능을 강화하여 피부 속부터 건강하게 만들어 줍니다.

- 금도금 미세침
- 교체형 헤드
- 100% 감마 멸균, 밀봉 포장
- 7년간의 의료기기 자체 생산 축적기술로 철저한 제조 공정과 안전 관리
- 3단계 분리로 세척 및 보관이 편리

The scientific skin care !

As a product which reduces the skin allergic reactions to metals by using a gold plating method and is designed safely for skin, INTOMR® has realized the skin science using the micro-needling therapy that has been proved over 100 years. Strengthen the authentic power of skin. The skin shall be transformed by itself.

MTS is the best for absorption of cosmetics!

MTS (micro-needling therapy system) is the optimum beauty device which helps cosmetics be absorbed deeply into the skin since it can make lots of holes into the skin by being rolled only several times.

No ! chemical procedures.

MTS can solve the secondary skin troubles which become sensitive more and more due to some kinds of chemical procedures. The micro-needling therapy of INTOMR® that increased the skin safety by using a gold plating method helps the skin healthy from the deep inside by strengthening the authentic functions of skin.

Gold plating MTS

As a product which reduces the skin allergic reactions to metals by using a gold plating method. Since it uses the wedge-type input method without using any chemical adhesives, it can be used even for sensitive skin with confidence.

Replaceable Head

It is very convenient to wash and keep since it consists of 3 detachable components, that is, the cover, the head and a handle. Convenient to wash and keep with 3 detachable components.

100% of Gamma sterilization

Strict Manufacturing Process and Safety Control by using the various kinds of medical device manufacturing technology accumulated for 7 years. 100% of Gamma radiation sterilization and Sealed Packing.

INTOMEDI®

Skin happiness at home

Consumer Line
